

Accelerating Change 2004

Physical Space, Virtual Space, and Interface

Institute for the
Study of
**Accelerating
Change**

- What:** The 2nd annual **Accelerating Change** conference (AC2004). 36 speakers, 300 attendees.
- Where:** Tressider Union at Stanford University, Palo Alto, CA
- When:** **November 5-7**
- Why:** To understand, guide, and profit from accelerating developments in science, technology, business, and humanist fields; to network a special community of interdisciplinary thinkers who seek a broad, balanced, empowering understanding of the near and longer-term sociotechnological future. Every year **Accelerating Change** gives you a unique opportunity to develop foresight about the most important forces of change in the modern world.
- Who:** Business professionals, technologists, strategists, change leaders, civic leaders, humanists, journalists, students, and others.
- Web:** www.accelerating.org
- Rate:** Register online before **October 20** and receive the Early Bird rate of **\$350**.

AC2004's three key themes:

- Accelerating interconnectivity of the **physical world**
- Increasing accuracy of the **simulated world**
- Growing importance of the physical-virtual, human-machine **interface**

Why Should You Attend?

- Network with top future-oriented thinkers
- Contribute your understanding of our changing times
- Explore the most important issues of the modern era
- Navigate the technological changes that will impact your life, profession, and the world

Forty-two leading change agents. Six keynotes.
Three themes. Three debates.

People and ideas that accelerate our world.
